OPEN HOUSES DO NOT FIND BUYERS.

The data has said so for years. Here is what they actually do, and how to run one right.

**4% OF BUYERS
FIND THEIR HOME
AT AN OPEN
HOUSE.**

52% find it online. NAR has shown this same gap for years. It is not close.

WHERE BUYERS ACTUALLY FIND THE HOME:

Online: 52%. Yard sign or open house: 4%. Source: NAR Profile of Home Buyers and Sellers, 2025.

SO WHAT IS AN OPEN HOUSE FOR?

It is a showing tool for buyers who already found the listing online and want to see it in person. It is not a buyer-acquisition tool.

THE REAL RETURN IS THE ROOM.

The neighbors who stop by
become your next listings. Run
for names and relationships, not
for a buyer who is not coming.

RUN THE NEXT ONE RIGHT:

- 1** Reset the seller pitch: "feedback and neighbors," not "we will find your buyer here."
- 2** Move your Sunday prep time into the online listing, where 52% actually look.
- 3** Track every visitor in your CRM. Names and conversations are the output.

THE TAKEAWAY

**BEFORE YOUR NEXT
OPEN HOUSE,
REWRITE THE
SELLER PITCH TO
"FEEDBACK AND
NEIGHBORS" AND
SET UP ONE WAY TO
CAPTURE EVERY
VISITOR'S NAME.**

The data has said so for years. Now you are the agent in the room who checked.
