

INSIDE THE INDUSTRY

1.8 PERCENTAGE POINTS.

That's the premium homes get when they close in the first four weeks. (Realtor.com, June 2026)

“

**YOUR LISTING HITS
DAY 30. BUYERS
STOP THINKING
"NEGOTIATION
OPPORTUNITY."**

They start thinking "what's wrong with this house."

OVERPRICE BY 10% AND YOUR LISTING SITS ABOUT A MONTH LONGER.

That's Zillow Research, not a
guess.

HOMES THAT SELL BETWEEN DAY 30 AND DAY 60 CLOSE 4.75% UNDER LIST.

Same Zillow study. The stigma
has a price tag.

44% OF CHICAGOLAND LISTINGS GO UNDER CONTRACT IN THE FIRST TWO WEEKS.

Median days on market: 27.

(Illinois Realtors / Redfin, May 2026) That's peak attention, and it closes fast.

OVERPRICING DOESN'T COST YOUR SELLER ONCE. IT COSTS THEM THREE TIMES.

- 1** Lost offers in week one, when attention is highest.
- 2** The eventual price cut, once the listing sits.
- 3** The stigma cut, when a buyer finally bites late and negotiates like it.

SELLERS WHO "TEST THE MARKET" AREN'T TAKING A RISK.

They're paying a compound tax on time.

WHAT TO RUN AT YOUR NEXT LISTING APPOINTMENT:

- 1** Draw day 30 on the whiteboard.
- 2** Show them the Realtor.com number: 1.8 percentage points.
- 3** Show them the Zillow number: a month longer, 4.75% under list.
- 4** Show them the Chicagoland number: 44% under contract in two weeks.

THE TAKEAWAY

**SAVE THIS FOR THE
NEXT SELLER WHO
WANTS TO "START
HIGH AND SEE
WHAT HAPPENS."**

Follow for what your brokerage won't teach you.
