

KALE MENTORS

Share Your Why — Mentor Cheat Sheet

You record a quick, raw clip about being a mentor. D.J. edits it into a polished video you can post to attract clients and good people. That's the whole deal — about 5 minutes.

1 Turn on highest quality FIRST

The most important step. Film it low-res and it can't be fixed later.

- **iPhone:** Settings → **Camera** → **Record Video** → choose **4K at 60 fps** (or 4K at 30).
- **Android:** Camera app → **Settings** (gear) → **Video resolution** → set to the **highest** option (**4K / UHD**, or **FHD 1080p 60fps**). Set the front camera too.

2 Set up your phone (30 seconds)

- **Go vertical.** Hold the phone up and down, not sideways.
- **Eye level.** Prop it on a cup, laptop, or shelf so the camera is at eye height — not looking up your nose.
- **Face a window or lamp.** Light in front of you, never behind you.
- **Quiet room.** No TV, no music, no hallway noise. And **wipe the lens**.

3 Hit record and answer these (pick 2–3)

Just talk like you're telling a friend. No script needed. Speak from the heart.

- Why did you become a mentor?
- What's a win you've had with one of your mentees?
- What's your favorite part of being a mentor?
- What would you tell an agent thinking about becoming a mentor?

Keep it under 60 seconds. One take is perfect. Mess-ups are fine — D.J. edits those out.

4 Send it to D.J. — use a LINK (don't text the raw file)

Texting the video shrinks the quality and wastes that 4K. A link keeps the original.

iPhone · Photos app

1. Open **Photos**, find your video.
2. Tap the **Share** button (square with arrow ↑).
3. Tap **"Copy iCloud Link."** Wait a few seconds.
4. Paste it in a text to D.J.

Android · Google Photos

1. Open **Google Photos**, tap your video.
2. Tap **Share**.
3. Tap **"Create link."**
4. Tap **Copy**, paste it in a text to D.J.

Text the link to D.J.

That's it. He'll turn it into something that makes you look like the pro you already are.
