

INSIDE THE INDUSTRY

FSBO SELLERS WALKED AWAY WITH \$65,000 LESS.

The AI listing story going viral never mentions that number.

**AN AI CAN WRITE A
LISTING
DESCRIPTION IN
TEN SECONDS. IT
CAN'T GET A
SELLER \$65,000
MORE.**

That's the gap between FSBO and agent-assisted sales right now.

\$65,000 IS THE REAL NUMBER IN EVERY AI LISTING STORY.

NAR's 2025 Profile of Home Buyers and Sellers, published November 2025, found FSBO homes sold for a median \$360,000 against \$425,000 for agent-assisted homes, an 18 percent gap. FSBO fell to 5 percent of sales, the lowest share on record, while 91 percent of sellers used an agent. AI tools can write the listing and pull the comps. None of that shows up as an extra \$65,000 at closing.

THREE LINES FOR THE SELLER COMPARING YOU TO AN AI LISTING TOOL:

- 1 "An AI can write the description. It can't negotiate against the buyer's agent."**
Reframes the tool as a task, not a replacement.
- 2 "FSBO sellers sold for a median \$65,000 less last year."**
Uses the NAR number directly, no interpretation needed.
- 3 "Only 5 percent of sellers went FSBO. Everyone else decided this wasn't worth doing alone."**
Normalizes hiring an agent as the majority decision, not the fallback.

THE TAKEAWAY

LEAD YOUR NEXT LISTING CONVERSATION WITH THE NUMBER, NOT THE PITCH.

\$65,000 answers the AI listing headline before the seller brings it up.
