D.J. PARIS

"I ALREADY USE AI" MEANS ALMOST NOTHING.

NAR's own 2026 numbers show why.

“

FORTY PERCENT OF AGENTS WHO "USE AI" HAVE TRIED IT ONCE AND STOPPED THERE.

NAR's 2026 tech report counts that the same way it counts a daily habit.

03 / 05

THE REAL SPLIT ISN'T YES OR NO. IT'S DAILY VERSUS ONCE.

NAR's 2026 REALTORS Technology Report breaks agent AI use into five groups: 23 percent use it daily, 25 percent use it weekly, 31 percent are still experimenting occasionally, 9 percent are curious but haven't tried it, and 12 percent aren't using it and don't plan to. Forty eight percent have turned it into a habit. Forty percent are stuck at "I tried it once." Saying "I use AI" puts both groups in the same sentence, and only one of them is actually ahead.

HOW TO MOVE FROM "TRIED IT" TO "DAILY," THIS WEEK:

1 **Pick the task agents who already use it say works.**

Listing descriptions, the single most

2 **common use among agents who use AI, at 75 percent.**

3 **Run it on every listing this week, not one.**

One use is a demo. Every listing is a habit.

4 **Keep the same tool for seven days straight.**

Switching tools every time you try resets you

5 **back to "experimenting."**

6 **Add a second task only after the first is automatic.**

Social captions and follow-up emails

7 **are next most common, at 56 and 52 percent. Stack them one at a time.**

THE TAKEAWAY

OPEN YOUR NEXT LISTING RIGHT NOW AND WRITE THE DESCRIPTION WITH AI. THEN DO IT AGAIN TOMORROW.

One try is a demo. Every listing is a habit.
